### DETAILED ACTION

1. The amendment filed April 21, 2003 and July 21, 2003 have been entered.

#### *Drawings*

2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on July 21, 2003 have been **approved**. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

#### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3724

4. Claims 51 and 52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muller, pn 4,452,118.

Regarding claims 51 and 52, Muller discloses a device/process with almost every structural limitation/step of the claimed invention but lacks the specific first and third support configurations. However, the Examiner takes Official notice that it is old and well known in the art to provide such support configurations for various well known benefits including moving work pieces to and from a particular operation. Therefore, it would have been obvious to one having ordinary skill in the art to provide first and third supports as claimed on the device of Muller for the well known benefits including those described above.

Further, regarding claim 52, Muller discloses a process with almost every active method step of the claimed invention but lacks the work piece being metallic. However, the Examiner takes Official notice that it is old and well known in the art to cut various types of elongate metallic members longitudinally. Therefore, it would have been obvious to one having ordinary skill in the art to use the cutting device of Muller to cut an elongate metallic member to longitudinally split the member into two pieces.

***Response to Arguments***

5. Applicant's arguments have been fully considered but they are not persuasive.
